Dill TPMS Relearn Procedure- A1002

A properly formatted scan tool is required to perform this procedure.

Sensor Relearn Procedure

- 1. Ensure all tires are inflated to the pressure indicated on the tire placard.**
- 2. With door closed, engage or depress the parking brake.**
- 3. Turn ignition to ON position (engine off).**
- 4. Press and hold driver's side door switch for 2 seconds. Release, then press again for 2 seconds. Release, then press again for 2-5 seconds.**
- 5. Place properly formatted scan tool over LF tire and press activate/test button, then proceed to RF, RR, and LR. Sensors must be activated in the body control module (BCM) within 90 seconds.**
- 6. TPMS indicator will be displayed for 5 seconds when each sensor ID has been received by control module.**
